DANDI AKHIL

SDET | PLAYWRIGHT & TYPESCRIPT

akhildandi14@gmail.com | +91-8328241134 | Hyderabad, Telangana, India

PROFESSIONAL SUMMARY

SDET with 3.5+ years of experience in test automation and functional testing across UI, API, database, and integration layers. Experienced in Playwright with TypeScript and Selenium WebDriver with Java, including automation framework development, Selenium-to-Playwright migration, and reusable test architecture using Page Object Model (POM). Skilled in end-to-end and regression testing, REST API validation, SQL-based data verification, and Jenkins-based test execution. Experienced in client collaboration, defect analysis, and mentoring team members across banking and enterprise applications.

TECHNICAL SKILLS

UI Automation: Playwright, Selenium WebDriver

Programming Languages: TypeScript, Java, JavaScript, SQL

Test Frameworks & Design Patterns: TestNG, JUnit, Cucumber BDD, Serenity BDD, Page Object Model (POM), Data-Driven Testing, Hybrid Framework

API Testing & Automation: REST Assured, Postman, Swagger/OpenAPI, REST API Testing, Request/Response Validation, Authentication, Authorization, Schema Validation

Database Testing: MySQL, SQL Queries, Joins, CRUD Operations, API-to-Database Validation

CI/CD & Build Tools: Jenkins, Azure DevOps, Maven, Gradle

Version Control: Git, Bitbucket

Test Reporting & Debugging: Playwright Trace Viewer, Playwright HTML Reports, Allure Reports, Extent Reports

Test Management & Collaboration: JIRA, HP ALM, Confluence

OPSOFT EXPERIENCE

OPSOFT TECHNOLOGIES

Senior Software Engineer

Hyderabad

Jul 2026 – Present

Project: Enterprise Learning Management System (ELMS)

- **UI Test Automation:** Developed and maintained 100+ automated scenarios using Playwright and TypeScript for critical workflows and regression testing across 10+ integrated modules.
- **Automation Framework:** Implemented Page Object Model (POM), reusable test utilities, and structured test data to improve maintainability, reusability, and scalability.
- **End-to-End Testing:** Validated end-to-end user journeys, UI functionality, business rules, and cross-module workflows across the enterprise learning management system.
- **API Testing:** Tested REST APIs using REST Assured, Postman, and Swagger/OpenAPI, validating HTTP methods, request/response payloads, headers, authentication, authorization, status codes, and negative scenarios.
- **Database & Integration Testing:** Executed MySQL queries to verify data persistence, business rules, API-to-database consistency, role-based access control (RBAC), and cross-module data flow.
- **CI/CD & Debugging:** Executed regression suites through Jenkins and investigated Playwright failures using Trace Viewer, screenshots, and test reports.
- **Test Execution & Defect Management:** Executed 500+ functional and API test scenarios and reported 100+ defects across UI, API, database, and integration layers.
- **Agile Collaboration:** Participated in requirement analysis, sprint planning, test scenario design, defect triage, and Agile/Scrum ceremonies.

INFOSYS EXPERIENCE

INFOSYS LTD
Software Quality Engineer
Hyderabad
Apr 2022 – Jun 2025

Client: Westpac Bank, Australia

Project: Home Loan Origination (BFSI)

- **Automation Framework Development:** Designed and developed a Selenium WebDriver framework from scratch using Java, implementing POM, reusable utilities, and test reporting components.
- **Playwright Migration:** Contributed to migrating an existing Selenium project to Playwright with TypeScript, adapting page objects, test scenarios, and reporting components.
- **UI Automation & Regression Testing:** Developed 500+ automated UI scenarios and maintained 100+ scenarios using Java, Selenium WebDriver, TestNG, and Cucumber, achieving approximately 65% coverage of targeted regression areas.
- **BDD Framework Development:** Contributed to migrating a legacy data-driven framework to Serenity BDD, developing Gherkin feature files and reusable step definitions.
- **Functional, Integration & Database Testing:** Performed functional and regression testing across home loan workflows, validated integrations across legacy, customer, credit, and downstream systems, and used MySQL to verify data consistency.
- **CI/CD & Version Control:** Executed automated suites using Jenkins and Gradle, managed code changes through Git and Bitbucket, and collaborated using feature, release, and master branches.
- **Client Collaboration:** Interacted regularly with client stakeholders to clarify requirements, discuss test scenarios, communicate testing progress, review defects, and coordinate issue resolution.
- **Team Mentoring & Recognition:** Trained new team members on Java, Selenium, and framework conventions through knowledge-transfer sessions and code walkthroughs; received multiple internal recognition awards.

EDUCATION

Marri Laxman Reddy Institute of Technology and Management
B.Tech | 2017–2021
CGPA: 7.0
